

Brief economic review GERMANY.

ISO Congress 28.05.2011, Prague

The Situation in Germany in short sentences:

65 % of the Shopfitters say that the Situation is good.

Over 30 % say that it is OK.

For the rest the situation is bad.

Unemployment is very low now and companies are hiring new employees.

We are faced with more and more online auctions and companies who are specialized in reorganizing the buying process of costumers.

There are a lot of new projects and work in the market, but the fight is still tough.

Repeatedly sustainability is a big issue, but nobody wants to pay more for that...

All the best to all my friends and I hope you have a brilliant ISO Congress in Prague.

Mit freundlichen Grüßen von unterwegs
